Overhead Solutions

Aerobus Opening System

- Easy assembly with click-on door fixing
- No hinges or stabilisation bars required
- SlowMotion technology for controlled and silent closing
- Non-invasive slim housing

AeroBus Kit for doors

Made of plastic and steel

| Weight (kg) | Item number | White |
|-------------|----------------|-------|
| 1.0 - 5.5 | 606.8L03.020 → | 000 |
| 2.4 - 12.3 | 606.8L03.040 → | 000 |

- Kit includes:**
- Symmetrical and dampened mechanisms (2 Pcs)
 - Linear mounting plates for the door fixing (2 Pcs)
 - Ø4 x 15mm screws (6 Pcs)
 - Ø4 x 35mm screws (8 Pcs)
 - Covers: right and left (2 Pcs)

Choosing the Correct AeroBus System

- Door height max is 400mm
- Door width max depends on the kit's load capacity
- Choose from 2 kits depending on height and weight requirements

| Door Height | 606.8L03.020.000 | 606.8L03.040.000 |
|-------------|------------------|------------------|
| 400 | 1.0 - 2.5kg | 2.4 - 5.5kg |
| 350 | 1.1 - 2.9kg | 2.7 - 6.3kg |
| 300 | 1.3 - 3.5kg | 3.2 - 7.4kg |
| 250 | 1.6 - 4.0kg | 3.8 - 8.9kg |
| 200 | 2.0 - 5.0kg | 4.8 - 11.0kg |
| 180 | 2.2 - 5.5kg | 5.3 - 12.3kg |

Overhead Solutions

Aerobus Opening System

- Compact and non-invasive system
- Easy mounting on the cabinet and rapid fixing on the door with a “click” and without hinges
- Damper included for a controlled and silent closure of the door
- 3-Way vertical and horizontal adjustment with door weight adjustment

Application

T = Ø5mm x min.
5mm deep
T = pilot holes
F = fixing holes

Cabinet fixing

Door fixing

Adjustments

Door adjustment

Damper strength adjustment

Overhead Solutions

AeroFlap Opening System

- Door moves above cabinet opening
- Perfect pause in every opening position
- 30 adjustments for door positioning
- SlowMotion technology for controlled and silent closing

Overhead Solutions

Klok XL Flap Stay

Choosing the Correct Quantity of Klok XL Flap Stays

To keep the door opening in any position, the number of Klok XL flap stays to use must be calculated according to the door weight, the door height and the maximum opening angle desired.

| Door weight and maximum opening angle | | Door height (mm) | | | | | | | | |
|---------------------------------------|------|------------------|-----|-----|-----|-----|-----|-----|-----|-----|

Why Choose Titus Connectors

Titus connectors add value to furniture and to furniture manufacturing

Titus connectors improve the quality of furniture and lower the cost of manufacturing and assembly while ensuring a high degree of customer satisfaction.

The most advanced range of connectors available on the market

Precise and efficient product design. **The broadest possible range of drilling tolerances** ensures reliable assembly and consistently strong joints. **Klix** locking feature, the engagement of interlocking teeth on cam and dowel, to prevent joint loosening in service or transit. **Expanding function** provides degrees of variation in out-of-tolerance drillings ensuring stronger joints and improved quality of furniture. **Twinstart thread** for faster and more stable insertion. **Depth stop collar** prevents over-insertion. **Firm tightening** for greater confidence in use. **Cam locks at 230°** ensuring a smooth tightening action and greater dowel pull-up.

Quickfit for hand dowel insertion. **Quickfit TL2, TL4** with the built-in self adjustment feature is the only available dowel that allows for pre-insertion. **Quickloc** one piece fitting for faster assembly with integrated expanding cam and dowel. **Zinc+steel dowel** for optimal strength and performance. **Precise dowel manufacturing** high precision of zinc and strength of steel assures 100% dimensional accuracy.

Easy and quick consumer friendly self-assembly of furniture

Self-assembly furniture offers consumers good value and instant availability of products. With the aim of providing consumer with simpler instructions, fewer parts and an easier assembly process, Titus has significantly reduced and simplified the number of fittings traditionally required in furniture production.

Titus connectors provide consumers with easy assembly and furniture producers with increased productivity:

- reduced number of assembly parts
- easy assembly instructions
- security of packed parts during transit

CAF

Quick & Easy

Consumer Assembly Friendliness

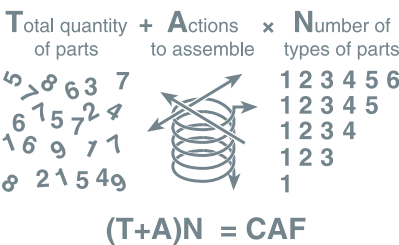

Easy and Quick Furniture Assembly

CAF formula

CAF=Consumer Assembly Friendliness

Titus CAF formula provides a comparative measure for customer satisfaction. By using it manufacturers are able to evaluate their products internally or against those of their competitors. While offering consumers easier and faster assembly, there are obvious advantages also for furniture manufacturers – buying, counting, bagging and stocking of fittings can be greatly reduced.

T Total quantity of parts + **A** Actions to assemble × **N** Number of types of parts

(T+A)N = CAF

Minimise the numbers in the Titus CAF™ formula to achieve:

- High customer satisfaction
 - Improved productivity
 - Higher profits

How does it work?

Comparative CAF scores to assemble a hand held demonstrator

| | T | A | N | CAF |
|---|---|----|---|-----|
| Connecting screw (traditional assembly) | 4 | 38 | 3 | 126 |
| Cam & dowel with single start thread | 6 | 21 | 4 | 108 |
| Cam & dowel with twinstart thread | 6 | 15 | 4 | 84 |
| Cam & TL2 dowel (self-assembly) | 6 | 7 | 4 | 52 |
| Cam & TL2 dowel (factory pre-inserted) | 2 | 3 | 2 | 10 |
| Quickloc | 2 | 3 | 1 | 5 |
| Fully assembled demonstrator | 1 | 0 | 1 | 1 |

System 1

Fittings for Rigid Assembly Systems

System Features

Double locking carcass screw

- Zinc diecast for precision
- Titus Double locking carcass screw makes an almost invisible connection
- Collar under the head to pull panels together
- 2nd 'lower' thread pulls against a 'faster' thread to provide maximum connection force and prevents overdriving of fastener
- Almost invisible in position
- Head can be 'fastcapped' or filled

Hi-Lo™ carcass construction screw

The Hi-Lo™ carcass construction screw (CCS) offers a strong, tolerant and cost effective connection with minimal panel preparation.

The combination effect of the elements of a Hi-Lo™ screw means

- A greater differential between drive torque and strip torque in fibrous and particle materials to ensure a reliable and repeatable fixing
- Hi-Lo™ threads provide minimum bursting forces
- 'Hi' thread gives low bursting component force from the sharp 30 degree angle thread
- 'Lo' thread at 60 degree angle uses the vertical force component to press fibrous and particle components of panels onto the 'Hi' thread and are contained by their greater height
- The very small shank on a Hi-Lo™ screw means less material displacement than conventional threads and enables minimum or partial drilling of pilot holes for quicker panel processing

Barrel nut (plastic)

- Used with Titus Hi-Lo™ screws
- Titus barrel nuts provide maximum strip torque for reasonable drive torque
- Capable of multiple reconnection repeatability

Cover caps

- Available in multiple colours
- All recess and head types offered
- High quality engineering polymers used in their construction
- Uniformity of holding with good tolerance
- Wide range of application and use conditions

System 1

Fittings for Rigid Assembly Systems

Hi-Lo™ Screw and Barrel Nut

- Hi-Lo™ screws have a twin thread for faster insertion
- 'Hi' threads and 'Lo' threads combine to give excellent pull out in chipboard
- Funnel head design means no countersinking
- Steel is case hardened for extra strength

Technical and mounting details

System 3

Fittings for Face and Edge Boring

System Features

Titus System 3 is a two component rigid face and edge drilled fastening with half turn to fasten. System 3 offers almost full concealment and wide tolerances in use.

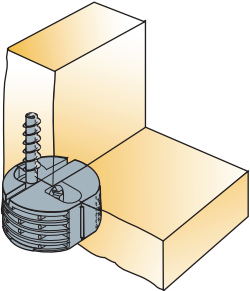

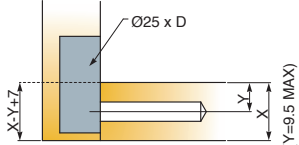

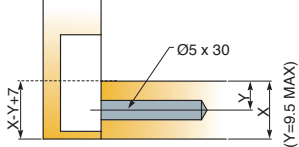

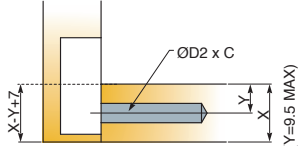

- Automatic or in-factory placement
- Pre-location pin ensures ease of assembly
- Less than one turn of a screwdriver to fasten
- Shelf edge installation of pin means maximum shelf cut size tolerance
- Can be used on 12mm shelf panels
- No loose parts for maximum convenience in RTA
- Drawer front fixing, cabinet construction

System 3

Fittings for Face and Edge Boring Concealed Housing

- One turn locking system reduces assembly time, both in the factory and home
- Pre-assembly feature for consumer convenience
- Choice of dowels to suit drilling
- Hi-Lo screw feature for faster insertion

System 4 Fittings for Face-boring Only

System features

Cost effective one piece fittings with face-boring benefits

- Flush and block components
- Face-boring only
- Good tolerances
- One piece connectors
- Angledrive versions fastening with maximum driving power and flexibility
- Quickloc™ versions need only one turn to tighten for fast assembly
- Foolproof consumer home insertion

Quickloc™ One-piece Connector

The integrated housing and dowel make Quickloc™ the most user-friendly and tolerant product available.

- High degree of drilling tolerance
- Push-in design
- Tool-free insertion
- Integrated expanding housing and dowel provide consistently stronger joints

Quickloc™ Assembly

1. Press Quickloc into the face board

2. Assemble the panels

3. Tighten in less than one turn

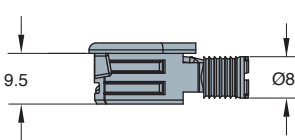

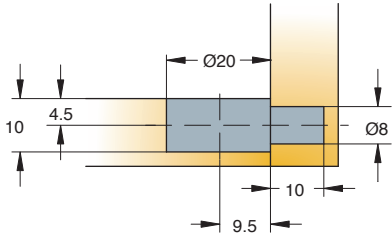

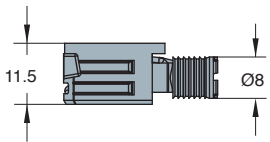

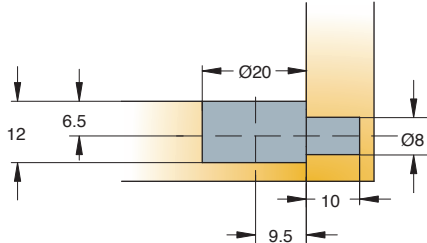

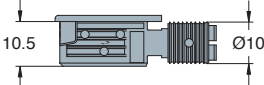

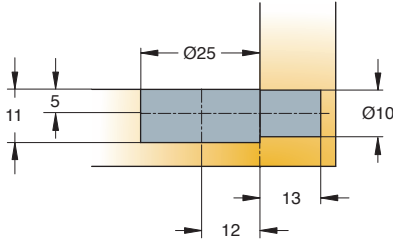

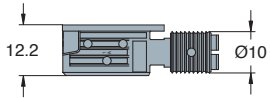

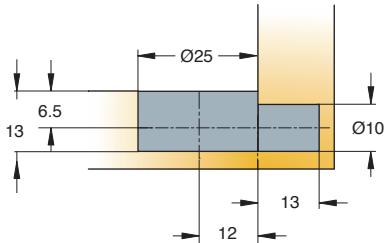

System 4

Quickloc™

One Piece Expanding Connector

- An innovative, one-piece connector, capable of hand insertion
- Is highly tolerant and tightens in less than one turn
- Is a face-bored product
- Offers a high degree of drilling tolerance and is the only connector of its type to provide pull-up of cabinet panels when tightened

System 5

Cams and Dowels

System Features

The most advanced cam and dowel range

Titus System 5 is a comprehensive range of cam and dowel connecting fittings with Klix and Quickfit features for all cabinet applications: panel-to-panel, panel-to-hollow profile, back-to-back

Dowels

- **Quickfit TL2, TL4 dowels**
a unique solution for factory pre-insertion, high level of drilling tolerances
- **Quickfit dowels**
quick hand insertion, easy assembly
- **Diecast dowels (zinc)**
precise manufacturing, optimal shape and design
- **Turned dowels (steel)**
'traditional' design, smooth surface, best strength performance
- **Combi dowels (zinc and steel)**
high precision of zinc, strength of steel, 100% dimensional accuracy and optimal performance

Titus Klix™

Titus Klix locking system ensures the engagement of the interlocking teeth on cam and dowel providing:

- vibration-proof joint
- rigid construction that will not loosen in service or transit

Dowel insertion time comparison

2 o'clock lock smooth closing

Linear cam profile assures smooth, firm tightening action and greater pull-up. The cam always locks at 2 o'clock lock (230°), enabling greater consumer confidence in use while improving furniture quality.

System 5

Cams and Dowels

Drilling tolerances

Optimal performance and perfect joint even with inaccurate drillings.

Zinc/Combi dowel

Quickfit TL2 dowel

Quickfit TL4 dowel

ETHC=Edge To Hole Center

Dowels for factory insertion

Quickfit TL2 and Quickfit TL4 are the only available dowels that allow for factory pre-insertion

- Easier packing
- Less damages in handling
- Perfect for the RTA market

System 5

Cams and Dowels

Zinc+steel Combi Dowels

Zinc+steel technology for optimal strength and performance

The Combi dowel combines steel and a small amount of zinc to ensure high precision and dimensional accuracy, essential to provide furniture manufacturers with the broadest possible range of drilling tolerances.

The steel neck and head provide better resistance to torsion and pull-out enabling a high performance joint

Zinc body:
Positive stop collar ensures correct insertion depth
Twinstart for faster and more stable insertion

The toroidal dowel head form transfers the forces between cam and dowel more effectively resulting in a small cam bursting force.

100% dimensional accuracy assured

System 5

Cams and Dowels

Quickfit Connectors

It is the fastest assembly system on the market. The Quickfit™ dowel may be inserted by hand, using only finger pressure. This eliminates the labour intensive process of screw-in assembly and the potential panel damage.

The Quickfit™ range of dowels has been extended to provide a complete family of fittings available in diameters of 5mm, 8mm and 10mm and lengths of 24mm and 34mm. These dowels are compatible with the range of Titus Ø15mm cams.

Assembly

1. Press the cam into face board

2. Insert the dowel into side panel

3. Assemble the panels

4. Tighten the cam to lock dowel

5. Assembled panels

System 5

Cams and Dowels

Quickfit TL Connectors

Quickfit-TL™ dowel offers furniture manufacturers a fast assembly system providing high drilling tolerances. It has a built-in self-adjustment feature, which enables common drilling inaccuracies to be overcome.

For the self-assembly furniture consumer, Titus Quickfit-TL™ is the most consumer friendly fitting on the market. Apart from the benefit of fully tightened joints and easy locking into the same position, Quickfit-TL™ provides an exceptionally smooth action when tightened, requiring very little effort.

Drilling tolerances

Marginal inconsistencies of drilling and the problems associated with the natural movement of wood panels, no longer present problems.

Quickfit-TL™ provides a tolerance of +1/-1mm on drilling operation while ensuring that the final result is a perfectly precise and aligned joint. No other assembly fittings system can offer such tolerances and still maintain a perfect joint.

Assembly

1. Press the cam into face board

2a. Either push dowel into edge hole or...

2b. Insert the dowel into side panel

3. Assemble the panels

4. Tighten cam to lock dowel

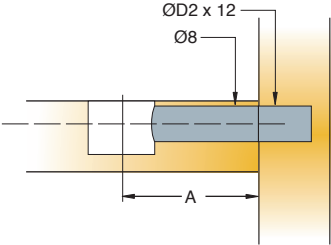

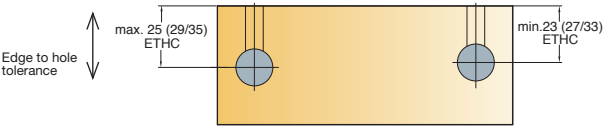

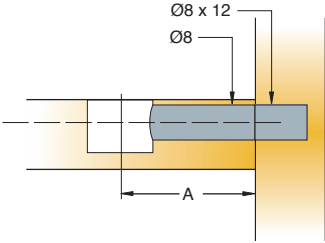

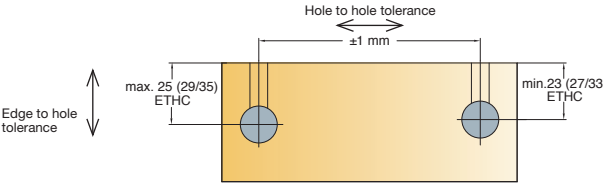

System 5

Cams and Dowels

Quickfit-TL Dowels

- Available in Ø5mm and Ø8mm for panel-to-panel applications
- Suitable for use with all Ø15mm Cam2000 and Cam3000 products
- ‘Klix’ locking feature provides a strong, vibration proof joint
- Highly tolerant in edge-inserted, TL4 also in face-inserted applications

Made of plastic

System 6

Quickfit-Expando Connectors

System Features

A face boring connector family for 32mm system drilling with full range of panel and application variants for all cabinet manufacturing applications

- Minimum drilling requirements
- Linear cam design for constant tightening loads when driving
- Angledrive feature on cam for maximum driving comfort
- Interchangeable pins for wood, plastic and steel applications
- Pins with twinstart drive for fast insertion
- Interchangeable Quickfit pin fastenings available
- Toolless fastening capable versions
- Back-to-back fastenings for common vertical panel fixing of shelves

System 6 consists of a range of 20mm and 25mm diameter housings, Quickfit™ and conventional dowels, end dowels and double ended dowels.

Housings are made from high grade plastic or zinc, with zinc cams.

Wedgex-6 connector is a special fastener without cam, simply to snap onto a pre-inserted dowel.

Applications

Titus System 6 is ideal for use in high volume production of case goods, closet and garage storage systems. Because no edge boring is required,

It is an excellent choice for manufacturing environments with limited drilling capacity.

Side-entry Drop-on

Side-entry insertion of shelf panel: from the side or from the top

Drop-on insertion of shelf panel: only from the top

Using drop-on connections allows for one-man installation

Angledrive feature

The angledrive feature on the cam allows for the angled position of the screwdriver with the locking action creating a tight and secure joint.

System 6

Quickfit-Expando Connectors

System Features

Outrigger/
Non outrigger

Outrigger

Non outrigger

Expando function

Expanding housings and dowels provide a tight joint.

Assembly

1. Press the housing into face board
2. Press the dowel into side panel

3. Assemble the panels

4. Tighten the joint

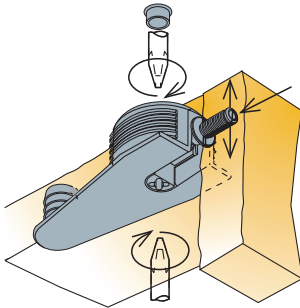

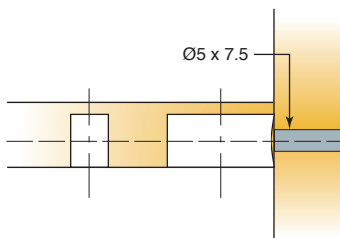

System 6

Quickfit-Expando

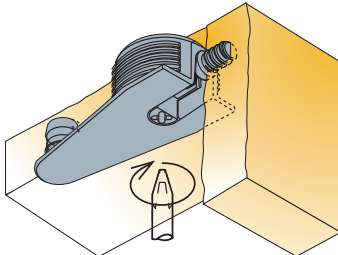

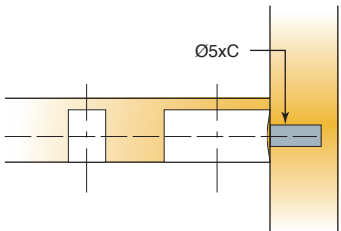

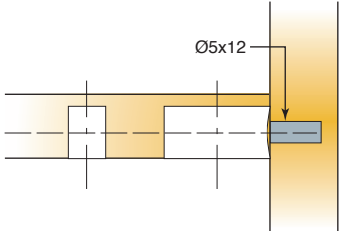

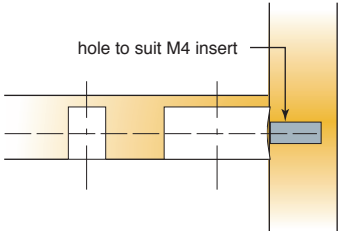

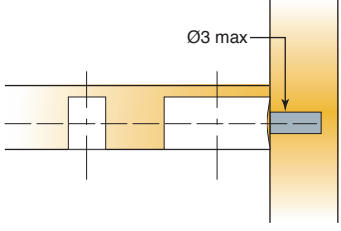

Expanding Dowels

- Available in Ø5mm, Ø8mm and Ø10mm for panel-to-panel, panel-to-hollow profile and back-to-back applications
- Suitable for applications with all Titus Ø20 and/or Ø25mm Expando-6 housings
- ‘Klix’ locking feature provides a strong, vibration proof connection
- Depth stop collar for accurate insertion

System 6 Quickfit-Expando Dowels

- Available in various Ø3mm and/or Ø5mm thread forms for screw-in, knock-in and/or 'spiked' hole applications
- Suitable for applications with all Titus Ø20mm and/or Ø25mm Expando-6 housings
- 'Klix' locking feature provides a strong, vibration proof connection
- Dowels feature an integral skirt which acts as a positive stop during insertion

Fastmount® Panel Mounting

Fastmount Panel Mounting Systems

Perfect Panel Mounting

The secret to Fastmount™ is the unique set of design registered interchangeable clips ideal for secure fastening. With Fastmount, panels can be easily removed and refitted in any sequence, time after time.

Combining speed, versatility and accuracy, the Fastmount system enables designers, installers and contractors to re-think the paneling process.

Fastmount is designed to perform on sea, land and in the air. Applications of use only limited by your imagination and common sense.

| | | |
|---------------------|--|---|
| Benefits | <ul style="list-style-type: none"> • No visible fixings • Eliminates panel damage – install panels during final build stages • Variety of mounting options – self tapping, glue and screw fix | <ul style="list-style-type: none"> • Allows for panel flex and expansion • Provides cavities for services and enhanced acoustics |
| Applications | <ul style="list-style-type: none"> • Ceilings, walls, feature panels and upholstery • Access, inspection and ventilation panels • Interior and selected exterior applications | <ul style="list-style-type: none"> • Upholstered, painted, prefinished and composite panels • Mounts into a wide variety of substrates e.g. GRP, composite, honeycomb • New build, re-fit and upgrades |

Fastmount Panel Mounting Systems

Low Profile Range

- Self tapping and surface mount for a variety of substrates,
- Suitable for rigid foam core, soft core materials, balsa, and plasterboard
- 360 degree lateral adjustment, fitting into a ø35 hole.

| | Mounting | Item number | White |
|---|--|-----------------------|-------|
| LP-M8 Low Profile Self Tapping Male Clip   100 Pcs | TapFast | 606.8F22.122 → | 201 |
| | Screws into plywood and MDF type boards with 10mm hole. Mark with CP-08, drill with CT-09 and install with CT-10 install tool. Use with LP-F8 and LP-DF8 female clips. | | |
| LP-SM8 Low Profile Surface Mount Male Clip   100 Pcs | Surface | 606.8F22.222 → | 801 |
| | Adhesive fix super groove base onto panel or frame. Can also be screw fixed with #6 gauge self tapping screw. Use with LP-F8 or LP-DF8 female Low Profile Range clips. | | |
| LP-F8 Low Profile Self Tapping Female Clip   100 Pcs | TapFast | 606.8F22.322 → | 201 |
| | Screws into plywood and MDF type boards with 25 to 25.4mm hole with CT-19 install tool. Use with LP-M8 and LP-SM8 male clips. | | |
| LP-DF8 Low Profile Self Tapping Female Clip, Coarse Thread   100 Pcs | TapFast | 606.8F22.322 → | 401 |
| | Screws into 25mm hole into drywall plasterboard and soft core material (rigid foam/balsa) from 10mm thick with CT-19 install tool, in battery drill with correct clutch setting. Use with LP-M8 and LP-SM8 male clips. | | |
| LP-AF8 Low Profile Female Autofit Clip   100 Pcs | Autofit | 606.8F22.322 → | 121 |
| | Female clip with lateral adjustment push fits into 35mm pre-drilled hole in deck head frame (grounds). Fits all Low Profile Range male clip halves. Designed for use with curved panels. | | |
